## **DETAILED ACTION**

### **Election/Restrictions**

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- I. Claims 1, 4, and 5-38, drawn to a method for indexing conducted in homogenous media, classified in class 435, subclass 91.2.
  - II. Claims 2, 3, and 5-38, drawn to a method for indexing wherein the reaction products are determined without physically separating determined products from the reactions, classified in class 435, subclass 91.2.
2. The inventions of Groups I and II are distinct inventions because they are directed to different methods regarding the critical limitations therein. For Group I, the critical feature is a method for indexing conducted in homogenous media. For Group II, the critical feature is a method for indexing wherein the reaction products are determined without physically separating determined products from the reactions. The completely distinct critical features of each Group support the undue search burden if they were examined together.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1631

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Papers should be faxed to Technical Center 1600 via the PTO Fax Center located in Crystal Mall 1.
